

Hallelujah! Before Passover, search entire home for all products with leaven / yeast in them and remove them from within the borders of your property (I usually discard them altogether). This is not a "holiday egg" hunt but a "Holy Day, sin hunt," to prepare us to "walk holy" with God after our Salvation. The Passover represents our Salvation by the Blood of Christ, the Spotless Lamb. Leaven represents sin. Eat unleavened bread and bitter herbs on Passover and all 7 days of "The Feast of Unleavened Bread".

Chemical leavening agents include:

baking powder

baking soda (sodium bicarbonate)

monocalcium phosphate

sodium aluminum phosphate (SALP)

sodium acid pyrophosphate (SAPP)

other phosphates

ammonium bicarbonate (hartshorn, horn salt, bakers ammonia)

potassium bicarbonate (potash)

potassium bitartrate (cream of tartar)

potassium carbonate (pearlash)

hydrogen peroxide

sodium lauryl sulfate (SLS)

ammonium lauryl sulfate (ALS)

sodium laureth sulfate / sodium laureth ether sulfate (SLES)

ammonium laureth sulfate/ammonium laureth ether sulfate (ALES)

= foaming, raising, thickening agents in shampoos, personal care products, shaving cream, ointments, and toothpaste

Some typical biological leaveners are:

beer (unpasteurised—live yeast)

buttermilk

ginger beer

kefir

sourdough starter

yeast

yogurt
