¹ FAINTEST constellation.

² HARDEST of all substances. Scratches all the other Gemstones.

³ LONGEST SOLAR MONTH. Ecliptic passes through her body lengthwise, from head to bottom, as she lies on her back. Because of the second yearly reset at the Fall Equinox, this month is usually longer. This is Preparation Month.

⁴ This is the Sabbath of Months. The Feasts of the Lord are from Moz 1st through Moz 22nd and the people go home on Moz 23rd.

⁵ SOFTEST Gemstone, by far. All the others can scratch it.

⁶ SHORTEST SOLAR MONTH. Ecliptic only passes through uppermost pincer for 7 days, after which it also passes through both feet of “The Man, Seizing” for 18 days.

⁷ LONG SOLAR MONTH. Ecliptic also takes a long route through the course of the lower, horizontal fish, lengthwise along most of its body, and through the bottom part of the vertical fish. Because of the first yearly reset, at the Spring Equinox, this month is sometimes longer.
